Jaeger™ Medical's SentrySuite™ Software Achieves Authority to Operate (ATO) Under U.S. Department of Defense's Risk Management Framework (RMF)

Jaeger™ Medical, a global leader in respiratory diagnostic products, is proud to announce that its core software platform, **SentrySuite™**, has received **Authority to Operate (ATO)** certification under the U.S. Department of Defense's (DoD) Risk Management Framework (RMF). The certification was granted via the Enterprise Mission Assurance Support Service (eMASS) system under ID #4085.

SentrySuite™ serves as the core platform for Jaeger's **Vyntus™** line of respiratory diagnostic devices, including **Spirometry, Pulmonary Function Testing (PFT), and Cardiopulmonary Exercise Testing (CPET)** systems. With this ATO, SentrySuite™ can now be securely deployed across U.S. DoD medical facilities, supporting clinicians with advanced respiratory diagnostics while meeting stringent cybersecurity requirements.

"At Jaeger™ Medical, we invest significant resources in cybersecurity. Our dedicated product security team works closely with our developers and customers to ensure secure environments for the Vyntus™ product line, and the extensive clinical data collected in Pulmonary Function Testing labs. This ATO certification is a testament to our commitment to data security and risk management," said Will Throp, President of Jaeger™ Medical.

About Jaeger™ Medical

Jaeger™ Medical, a Trudell Medical Group company, is a global leader in respiratory diagnostics, delivering cutting-edge technology to healthcare professionals worldwide. With a legacy spanning over 70 years, Jaeger™ Medical has been at the forefront of pulmonary function testing, shaping the future of respiratory health through innovation in diagnosis and clinical decision making.
