

# Translating Pulmonary Function Test Results into Practical Clinical Interpretations

Join our educational webinar with Prof. Dr. Neil MacIntyre, who will provide a comprehensive overview of pulmonary function testing. Dr. MacIntyre will discuss the fundamentals of spirometry, lung volume measurements, and carbon monoxide uptake—essential tools for identifying and quantifying lung impairment.

Learn a step-by-step approach to interpreting PFT results, with a focus on developing clear, standardized phrases that make findings easy to understand for clinicians and patients alike. The session will also explore the application of ERS/ATS\* interpretive algorithms and examine challenging scenarios such as borderline values and conflicting patterns.

Designed to enhance clinical communication and support the development of AI-driven programs, this webinar is an invaluable resource for healthcare professionals involved in respiratory care.
